INDEX TO VOLUME II

Ackman, Benjamin, and Browne, William W. The fallacy of refined readings of gas percentages in the fermentation of lactose peptone bile and lactose broth 249

Alfalfa bacteria, Influence of hydrogen ion concentration of medium on the reproduction of 629

***B. coli* and *B. typhi*, Creatinine production by** 187

—— and *B. Welchii* groups, The presence of the, in the intestinal tract of fish (*Stenomus chrysops*) 417

***B. diphtheriae*, The morphology of a strain of** 361

***B. pneumoniae*, A curious accident due to** 245

***Bact. abortus var. lipolyticus*, The large numbers of, which may be found in milk** 185

Bacteria, The evolution and relationship of the great groups of 167

——, Families and genera of the 505

Bacterial disease of the Wragg cherry, A 79

—— implantation, Diet versus 47

—— metabolism of sulfur, Studies on the 585

Bacteriology, Early instructors in, in the United States 595

Bacterium pyogenes and its relation to suppurative lesions in animals 619

Bergey, David H. Early instructors in bacteriology in the United States 595

Besemer, A. M. A study of five members (or so-called species) of the septicemia hemorrhagica (pasteurella) group of organisms with special reference to their action on the various carbohydrates 177

***Blastocystis hominis*: its characteristics and its prevalence in intestinal content and feces in South Carolina** 369

Boyd, Mark F. A note on the preparation of hyphomycetes for microscopical examination 365

Browne, William W. The presence of *B. coli* and *B. Welchii* groups in the intestinal tract of fish (*Stenomus chrysops*) 417

—— and Ackman, Benjamin. The fallacy of refined readings of gas percentages in the fermentation of lactose peptone bile and lactose broth 249

Buchanan, R. E. Studies in the nomenclature and classification of the bacteria.

II. The primary subdivisions of the schizomycetes 155

III. The families of the eubacteriales 347

IV. Subgroups and genera of the coccaceae 603

Calcium hypochlorite, Observations on the types of organisms isolated from water after treatment with 355

Capsules of bacteria, A simple method for staining the 241

Characterization and classification of bacterial types, Report of committee on 505

Chicks, Trichomonasis of: a new and highly fatal disease 441

Clark, William Mansfield, and Lubs, Herbert A. The colorimetric determination of hydrogen ion concentration and its applications in bacteriology ..... I, 1; II, 109; III, 191
Coccaceae, Subgroups and genera of the 603
Coccidia in subepithelial infections of the intestines of birds 73
Colon-aerogenes group from silage, The 635
Colorimetric determination of hydrogen ion concentration and its applications in bacteriology, The ..... I, 1; II, 109; III, 191
Committee on characterization and classification of bacterial types, Report of 505
Conn, H. Joel. Soil flora studies ..... I, 35; II, 137
Conn, Professor H. W. 501
Counting the living bacteria in milk—a practical test 567
Creatinine production by *B. coli* and *B. typhi* 187
Curious accident due to *B. pneumoniae*, A 245
De Bord, George G. The fuchsin-aldehyde reaction on endo medium 309
Diet versus bacterial implantation 47
Diphtheroid group, Classification of the 269
—— —— of organisms, A study of the, with special reference to their relation to the streptococci.
I. Characteristics of a peculiar pleomorphic diphtheroid 81
II. Classification of the diphtheroid group 269
III. Immunological relations 447
Disinfectants, The importance of uniform culture media in the bacteriological examination of 315
Early instructors in bacteriology in the United States 595
Endo medium, The fuchsin-aldehyde reaction on 309
Esten, W. M. Professor H. W. Conn 501
Eubacteriales, The families of the 347
Evans, Alice C. The large numbers of *Bact. abortus var. lipolyticus* which may be found in milk 185
Evolution and relationship of the great groups of bacteria, The 165
Families and genera of the bacteria, The. Preliminary report of the Committee of the Society of American Bacteriologists on characterization and classification of bacterial types. C.-E. A. Winslow, Chairman, Jean Broadhurst, R. E. Buchanan, Charles Krumweide, Jr., L. A. Rogers and George H. Smith 505
I. Previous systems of bacterial classification 506
II. Principles of botanical nomenclature 529
III. System of classification recommended by the committee: Families 537
IV. System of classification recommended by the committee: Genera 542
V. Suggested outline of bacterial classification 549
Organisms intermediate between bacteria and protozoa 562
Artificial keys 563
—— of the eubacteriales, The 347
Formation of hydrogen sulfide from certain sulfur compounds under aerobic conditions 585
Fuchsin-aldehyde reaction on endo medium, The 309

Fulmer, H. L., and Fred, E. B. Nitrogen assimilating organisms in manure . 423
Fred, E. B., and Fulmer, H. L. Nitrogen assimilating organisms in manure . 423
—— and Loomis, N. E. Influence of hydrogen ion concentration of medium on the reproduction of alfalfa bacteria . 629
Frost, W. D. Counting the living bacteria in milk—a practical test . 567
Gas percentages, The fallacy of refined readings of, in the fermentation of lactose peptone bile and lactose broth . 249
Hadley, Philip B. Coccidia in subepithelial infections of the intestines of birds . 73
——. Note on the reaction of the paratyphoids, Alpha and Beta, in litmus milk . 263
Heinemann, P. G. The morphology of a strain of *B. diphtheriae* . 361
Hull, Thomas G., and Rettger, Leo. F. The influence of milk and carbohydrate feeding on the character of the intestinal flora. IV. Diet versus bacterial implantation . 47
Hunter, O. W. The colon-aerogenes group from silage . 635
Huntoon, F. M. A simple method for staining the capsules of bacteria . 241
Hydrogen ion concentration, The colorimetric determination of, and its applications in bacteriology . I, 1; II, 109; III, 191
—— ——, The effect of, on the production of precipitates in a solution of peptone and its relation to the nutritive value of media . 351
—— —— of medium, Influence of, on the reproduction of alfalfa bacteria . 629
—— sulfide, Formation of, from certain sulfur compounds under aerobic conditions . 585
Hyphomycetes, A note on the preparation of, for microscopical examination. 365
Immunological relations of the diphtheroid group . 447
Intestinal flora, The influence of milk and carbohydrate feeding on the character of the . 47
—— tract of fish (*Stenomus chrysops*), The presence of *B. coli* and *B. Welchii* groups in the . 417
Intestines of birds, Coccidia in subepithelial infections of the . 47
Johnson, B. R., and Levine, Max. Characteristics of coli-like microorganisms from the soil . 379
Kligler, I. J. The effect of hydrogen ion concentration on the production of precipitates in a solution of peptone and its relation to the nutritive value of media . 351
——. The evolution and relationship of the great groups of bacteria . 165
Lactose litmus agar plate, The use of a three per cent, for the demonstration of *B. coli* in water examination . 237
—— peptone bile and lactose broth, The fallacy of refined readings of gas percentages in the fermentation of . 249
Levine, Max, and Johnson, B. R. Characteristics of coli-like microorganisms from the soil . 379
Litmus milk, Note on the reaction of the paratyphoids, Alpha and Beta, in 263
Living bacteria in milk, Counting the . 567
Loomis, N. E., and Fred, E. B. Influence of hydrogen ion concentration of medium on the reproduction of alfalfa bacteria . 629

Lubs, Herbert A., and Clark, William Mansfield. The colorimetric determination of hydrogen ion concentration and its applications in bacteriology ..... I, 1; II, 109; III, 191
Lynch, Kenneth M. *Blastocystis hominis:* its characteristics and its prevalence in intestinal content and feces in South Carolina 369
Manure, Nitrogen assimilating organisms in 423
Mellon, Ralph R. A study of the diphtheroid group of organisms with special reference to their relation to the streptococci.
I. Characteristics of a peculiar pleomorphic diphtheroid 81
II. Classification of the diphtheroid group 269
III. Immunological relations 447
Meyer, E. M. The use of a three per cent lactose litmus agar plate for the demonstration of *B. coli* in water examination 237
Microorganisms, Characteristics of coli-like, from the soil 379
Microscopical examination, A note on the preparation of hyphomycetes for .. 365
Milk and carbohydrate feeding, The influence of, on the character of the intestinal flora 47
——, The large numbers of *Bact. abortus var. lipolyticus* which may be found in 185
Morphology of a strain of *B. diphtheriae*, The 361
Mudge, Courtland S. The effect of sterilization upon sugars in culture media 403
New differential plating methods for *B. bifidus* (Tissier) and *B. acidophilus* (Moro) 435
Nitrogen assimilating organisms in manure 423
Nomenclature and classification, Studies in the, of the bacteria .. 155, 347, 603
Nutritive value of media, The effect of hydrogen ion concentration on the production of precipitates in a solution of peptone and its relation to the 351
Organisms isolated from water, Observations on the types of, after treatment with calcium hypochlorite 355
Paratyphoids, Alpha and Beta, Note on the reaction of the, in litmus milk .. 263
Plating methods, New differential, for *B. bifidus* (Tissier) and *B. acidophilus* (Moro) 435
Pleomorphic diphtheroid, Characteristics of a peculiar 81
Primary subdivisions of the schizomycetes, The 155
Report of committee on characterization and classification of bacterial types 505
Rettger, Leo F., and Hull, Thomas G. The influence of milk and carbohydrate feeding on the character of the intestinal flora. IV. Diet versus bacterial implantation 47
Sackett, Walter G. A bacterial disease of the Wragg cherry. Preliminary note 79
Schizomycetes, The primary subdivisions of the 155
Sears, H. J. Creatinine production by *B. coli* and *B. typhi* 187
Septicemia hemorrhagica (pasteurella) group of organisms, A study of five members (or so-called species) of the, with special reference to their action on the various carbohydrates 177
Silage, The colon-aerogenes group from 635

Simonds, J. P. A curious accident due to *B. pneumoniae* 245
Simple method for staining the capsules of bacteria, A 241
Smeeton, M. A. Observations on the types of organisms isolated from water after treatment with calcium hypochlorite 355
Society of American Bacteriologists. Report of committee on characterization and classification of bacterial types 505
Soil, Characteristics of coli-like microorganisms from the 379
—— flora studies ..... I, 35; II, 137
Sterilization, The effect of, upon sugars in culture media 403
Study of five members (or so-called species) of the septicemia hemorrhagica (pasteurella) group of organisms with special reference to their action on the various carbohydrates, A 177
Sugars in culture media, The effect of sterilization upon 403
Suppurative lesions, Bacterium pyogenes and its relation to, in animals 619
Tanner, Fred W. Studies on the bacterial metabolism of sulfur. I. Formation of hydrogen sulfide from certain sulfur compounds under aerobic conditions 585
Torrey, John C. New differential plating methods for *B. bifidus* (Tissier) and *B. acidophilus* (Moro) 435
Trichomonasis of chicks: a new and highly fatal disease 441
Uniform culture media, The importance of, in the bacteriological examination of disinfectants 315
Ward, Archibald R. Bacterium pyogenes and its relation to suppurative lesions in animals 619
Water examination, The use of a three per cent lactose litmus agar plate for the demonstration of *B. coli* in 237
Weinzirl, John. Trichomonasis of chicks: a new and highly fatal disease 441
Wragg cherry, A bacterial disease of the 79
Wright, J. H. The importance of uniform culture media in the bacteriological examination of disinfectants 315
